REFLECTIONS ON PRACTICE

Physical changes noticed (flexibility, strength, stamina):-

After completing the daily practices, I observe various positive changes in my routine. My body became more flexible and energetic.

Breathing exercises helped reduce stress and anxiety. Meditation improved my concentration and focus.

Initially, Surya namaskar felt difficult, but regular practice improved my stamina day by day. I also felt emotionally balanced and more disciplined.

This reflection shows that yoga not only but also enhances mental health.

Daily yoga practice increased my stamina significantly. I felt less tired while performing physical activities and could perform more rounds of Surya namaskar without feeling exhausted. Overall, yoga has made my body healthier, stronger and more energetic.

Mental/emotional effects (Concentration, calmness, stress relief)

During my 10 day yoga practice, I noticed significant improvement in my mental focus and emotional well being. Practicing pranayama, meditation and asanas helps develop better concentration. I could focus on tasks for longer periods without feeling distracted.

Yoga also brought a sense of calmness and inner peace. Daily meditation and deep breathing exercise reduced mental restlessness and made me feel more relaxed.

I experienced effective stress relief through yoga, whenever I felt tension, anxiety, simple practices like Anulom-vilom and Bhramari help me release stress and maintain emotional balance.

Overall yoga not only strengthened my body but also improved my mental clarity, emotional stability and self resilience helping me face daily challenges with a calm and positive mind.

PEER/SCHOOL ACTIVITIES

Report on

Yoga demonstration/peer teaching in class or school

Yoga is an ancient indian practice that helps in the development of physical mental and emotional health. Yoga demonstration and peer teaching in class or school is an effective method of learning because students learn better by observing and participating together. Demonstration makes learning clear, while peer teaching increases confidence and interest among students. It also encourages regular practice of yoga and helps in reducing stress and anxiety.

Before conducting the activity proper planning was done. Suitable yoga asanas were selected according to the age and physical activity of students. A clean and well ventilated place was arranged. Yoga mats were provided and students were asked to wear comfortable clothes. Some students were selected as peer teachers and were guided in advance about correct method of demonstration, safety rules and methods.

the activity began with a brief introduction by the teacher explaining the importance of yoga. warm up exercise were demonstrated by the peer teacher to prepare the body. After this ~~year~~ yoga asanas such as Tadasana, and Paschimotāsana were demonstrated one by one the teacher observed the student & corrected their postures whenever necessary. The session ended with shavasana for relaxation and mental calmness.

The teacher played the role of a guide and supervisor throughout the activity. Yoga was practiced with proper breathing and without force. student were stop in case of discomfort.

Yoga demonstration and peer teaching proved to be very useful. students showed activities helped in physical fitness, mental relaxation and overall personality development. Thus, yoga demonstration and peer teaching is an effective and meaningful practice in holistic education.

Suggestions for integrating Yoga in school

Schools can integrate yoga by including short stretching & breathing breaks during classes & beginning the morning assembly with simple yoga practice. Yoga can be added to the regular physical education timetable and teachers can be trained in basic techniques to guide students safely. Schools should also create a dedicated space for yoga & organize weekly sessions with trained instructors during exams or stressful periods, yoga can help calm students & improve focus.

Overall, integrating yoga supports a healthier school environment.
